20 September 1985

Mr. Frank C. Fagan
Director of Nail and Plant
Services Operations
Bostitch Division of Textron Inc.
Briggs Drive
East Greenwich, RI 02818

Dear Mr. Fagan:

As we discussed on 20 September 1985, the following language needs to be added to the RACT Agreement (A.R. File No. 85-8-AP) to satisfy the decision of the Hearing Officer who responded to an EPA comment (enclosed).

This language will form an addendum to the Agreement, specifically paragraph 6:

Emission limits for the replacement coatings mentioned above are as follows:

- * Staple adhesives A' and B' will be at or below 2.9 pounds VOC/gallon (minus water),
- * Nail coating J' will be at or below 4.3 pounds VOC/gallon (minus water), and
- * Higher solids paint formulations will be at or below 3.05 pounds VOC/gallon (minus water).

Formulas C, D, F and G, when modified, will be at or below their emission limit as of 31 July 1985, namely:

- * C: 5.86 pounds VOC/gallon (minus water)
- * D: 5.86 pounds VOC/gallon (minus water)
- * F: 5.55 pounds VOC/gallon (minus water)
- * G: 5.45 pounds VOC/gallon (minus water)

Very truly yours,

Martha S. Delaney, Engineer
Division of Air and Hazardous Materials

MSD:tg

I agree with the above statement and to its inclusion as an addendum
to the Agreement.
